

PRODUCT: KoolCote JAWS OVERLAY

CODES: OJAWS50 (White)
OSJAWS50 (Sand)

TYPE: ONE-COMPONENT CONCRETE/POLYMER MIX

PRODUCT DESCRIPTION: KoolCote Overlay is a one-component product consisting of a concrete and sand matrix mixed with a polymer that dries to a uniform bond coat. It is a stamped concrete system that covers old or new existing concrete surfaces with a thin layer. KoolCote Overlay, when stamped, duplicates the look and appearance of many natural stones, slate, or granite, as well as rock formations.

KoolCote Overlay may be color sealed with KoolCote All-Purpose Acrylic Concrete Finish or stained with KoolCote Acrylic Concrete Stain, achieving many different design effects.

USES: KoolCote Overlay may be used on residential or commercial projects. It is ideal for hotel lobbies, sidewalks, pool decks, and patios, etc.

MIXING INSTRUCTIONS: Add approximately 1 to 1 1/2 gallons of water per 50 pound bag of KoolCote Overlay.
