PRODUCT: KoolCote TEXTURE PREMIX

TYPE: TWO-COMPONENT CONCRETE/POLYMER MIX

PRODUCT DESCRIPTION: KoolCote Texture Premix is a two component product consisting of a concrete and sand matrix mixed with a polymer that dries to a uniform bond coat. It is a system that covers existing concrete with many different texture designs forming a thin layer of concrete that may be color coated with KoolCote All Purpose Acrylic Concrete Finish on a wide variety of decorative texture finishes.

KoolCote Texture Premix is very easy to use with stencils, allowing the creation of design patterns such as cobblestone, brick, runningbond, fanstone, flagstone, paver, and many others.

USES: KoolCote Texture Premix is ideal for patios, pool decks, sidewalks, wall effects and vehicular traffic.
